

# Commercial Trash Enclosures

## FOLLOW THESE REQUIREMENTS TO KEEP OUR WATERWAYS CLEAN

Trash enclosures, such as those found in commercial and apartment complexes, typically contain materials that are intended to find their way to a landfill or a recycling facility.

**These materials are NOT meant to go into our local lakes and rivers.**

### PROTECT WATER QUALITY BY FOLLOWING THESE SIMPLE STEPS

#### PUT TRASH INSIDE

Place trash inside the bin  
(preferably in sealed bags)

#### CLOSE THE LID

Prevent rain from  
entering the bin in order  
to avoid leakage of  
polluted water runoff

#### KEEP TOXICS OUT

- Paint
- Grease, fats and used oils
- Batteries, electronics and fluorescent lights

### SOME ADDITIONAL GUIDELINES, INCLUDE

#### Sweep Frequently

Sweep trash enclosure areas frequently, instead of hosing them down, to prevent polluted water from flowing into the streets and storm drains.

#### Fix Leaks

Address trash bin leaks immediately by using dry clean up methods and report to your waste hauler to receive a replacement.

#### Construct Roof

Construct a solid cover roof over the existing trash enclosure structure to prevent rainwater from coming into contact with trash and garbage. Check with your local City/County for Building Codes

To report illegal storm water discharges, call (877) 89-SPILL  
For more information on the City's Environmental Programs,
