Fireworks Safety

Each year in the United States, more than 10,000 people suffer eye injuries and burns from fireworks. Annually, three thousand fires are caused by fireworks, and most of these incidents are related to the use of illegal fireworks, as well as state-approved fireworks that are lit by non-professionals.

- Since 2003, 45% of persons injured from fireworks are children 14 years and younger.
- Children ages 5 to 9 years have the highest injury rate involving fireworks.
- Sparklers are associated with the most injuries involving children under the age of 5.
- Sparklers can reach temperatures of more than 1,000°F.

The City's Police Department will be working in conjunction with the Orange County Fire Authority to enforce the relevant laws on July 4th, and the days around this holiday. Violations of the City's municipal code are punishable by a fine up to \$1,000 or imprisonment up to 1 year, or by both such fine and imprisonment. The Police Department will enforce a zero tolerance policy on the use and possession of any fireworks.
