Phase I Initial Site Assessment

ATWOOD MULTI-PURPOSE TRAIL PROJECT

INITIAL SITE ASSESSMENT

PREPARED FOR:

CITY OF PLACENTIA PUBLIC WORKS DEPARTMENT
401 EAST CHAPMAN AVENUE
PLACENTIA, CALIFORNIA 92870

PREPARED BY:

SAPPHOS ENVIRONMENTAL, INC.
430 NORTH HALSTEAD STREET
PASADENA, CA 91107

APRIL 2023

EXECUTIVE SUMMARY

This Initial Site Assessment (ISA) has been prepared for Alta Planning + Design for submittal to the City of Placentia (City) in support of the Atwood Multipurpose Trail Project (proposed project). This ISA will be used as supporting environmental documentation and as reference in the decision-making process to be undertaken by the Orange County Transportation Authority (OCTA), the project sponsor, and the California Department of Transportation (Caltrans), the administering agency for this proposed project. The City will act as the Lead Agency pursuant to the California Environmental Quality Act (CEQA).

The purpose of this ISA is to outline recognized environmental conditions (RECs) to show the extent to which the proposed project has the potential to pose a risk or hazard to people or properties located within 0.25 mile of the proposed project area. RECs include, but are not limited to, the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. This ISA has been conducted in accordance with the American Society of Testing and Materials (ASTM) Standard E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," in order to satisfy 40 Code of Federal Regulations (CFR) Part 312 as required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).[1]

The proposed project includes the construction of a 1.0-mile-long trail stretching from east of the BNSF railroad tracks to Lakeview Avenue. The proposed trail would include a paved multiuse path; new midblock crossings with ADA accessibility including modified sidewalks and curb ramps at Richfield Road, South Van Buren Street, and Fee Ana Street; a trailhead at Parque De Los Niños; new street signs and striping; wayfinding signage; and a staging area to the east of S. Van Buren Street between the channel and Vicente Avenue.

This ISA includes a reconnaissance survey of the project location, performed on January 13, 20, and 25, 2022, by Sapphos Environmental, Inc. This assessment included a review of available federal and state data reported by Environmental Data Resources, Inc. (EDR), available regulatory agency environmental records, and available site history and records. The review also included properties in the immediate vicinity to the proposed project. Records indicated listed locations within 1 mile of the proposed project site are listed in the EDR report. The information procured during this investigation was used to identify, to the extent practical and within the limitations of the scope, RECs associated with the site due to current or past land use. There is one existing REC identified within the proposed project boundary and one REC located within the proposed staging area for the proposed project.

1. INTRODUCTION

1.1 Project Background

This Initial Site Assessment (ISA) has been prepared in support of the Atwood Multipurpose Trail Project (proposed project) located in the City of Placentia (City), Orange County, California (Figure 1, *Regional Vicinity Map*). This ISA will be used as supporting environmental documentation and as reference in the decision-making process to be undertaken by the Orange County Transportation Authority (OCTA), the project sponsor, and the California Department of Transportation (Caltrans), the administering agency for this proposed project. The City will act as the Lead Agency pursuant to the California Environmental Quality Act (CEQA). OCTA approved the City's request for federal funds as part of the Bicycle Corridor Improvement Program (BCIP) through the Federal-aid Congestion Mitigation Air Quality Program. OCTA awarded funding to begin the preliminary engineering and environmental analysis phase to connect the Orange County Flood Control District (OCFCD) maintenance access roads to future installed City sidewalks.

The proposed project would involve the construction of a multiuse trail along the Atwood Channel, maintained by the District, within the community of Atwood in the City (Figure 1, *Regional Vicinity Map*). The proposed project site is comprised of portions of two gravel paved vacant access roads that are located along the northern and southern sides of the Atwood Channel, paved streets that cross over the channel, a gated intersection with the fenced pedestrian bridge to access Parque De Los Niños, and the southwestern edge of the existing Lakeview Loop roadway. The project site is generally bounded by Orangethorpe Avenue to the north, Lakeview Avenue to the east, Miraloma Avenue to the south, and Jefferson Street to the west. The proposed project would be centrally located and in close proximity to existing bikeways (Class I, Class II, and Class III), railroad tracks, and recreational facilities. The proposed trail would stretch east of the BNSF railroad tracks, approximately 600 feet east of Jefferson Street, to Lakeview Avenue and continue east adjacent to the Parque de Los Niños and the Placentia Veterans Village housing development along the Atwood Channel, alternating between north and south sides of the maintenance easement (Figure 2, *Local Vicinity Map*; Figure 3, *Proposed Project*).

The proposed project includes the construction of a 1.0-mile-long trail stretching from east of the BNSF railroad tracks to Lakeview Avenue. The proposed trail would include a paved multiuse path; new midblock crossings with ADA accessibility including modified sidewalks and curb ramps at Richfield Road, South Van Buren Street, and Fee Ana Street; a trailhead at Parque De Los Niños; new street signs and striping; wayfinding signage; and a staging area to the east of S. Van Buren Street between the channel and Vicente Avenue.

The City is considering three project elements:

1. Trail fencing along the edge of the channel,
2. A trail extension from Jefferson Street to the BNSF rail line, and
3. A bridge or grade separation crossing over the existing BNSF railroad tracks.

Of the three elements, the potential trail extension and the bridge or grade separation crossing, a 0.1-mile length, are considered "Optional To Be Determined" by the City and Caltrans (as labeled in Figure 3), and neither is a part of the project's limits of work.

FIGURE 1
Regional Map
Atwood Multipurpose Trail Project

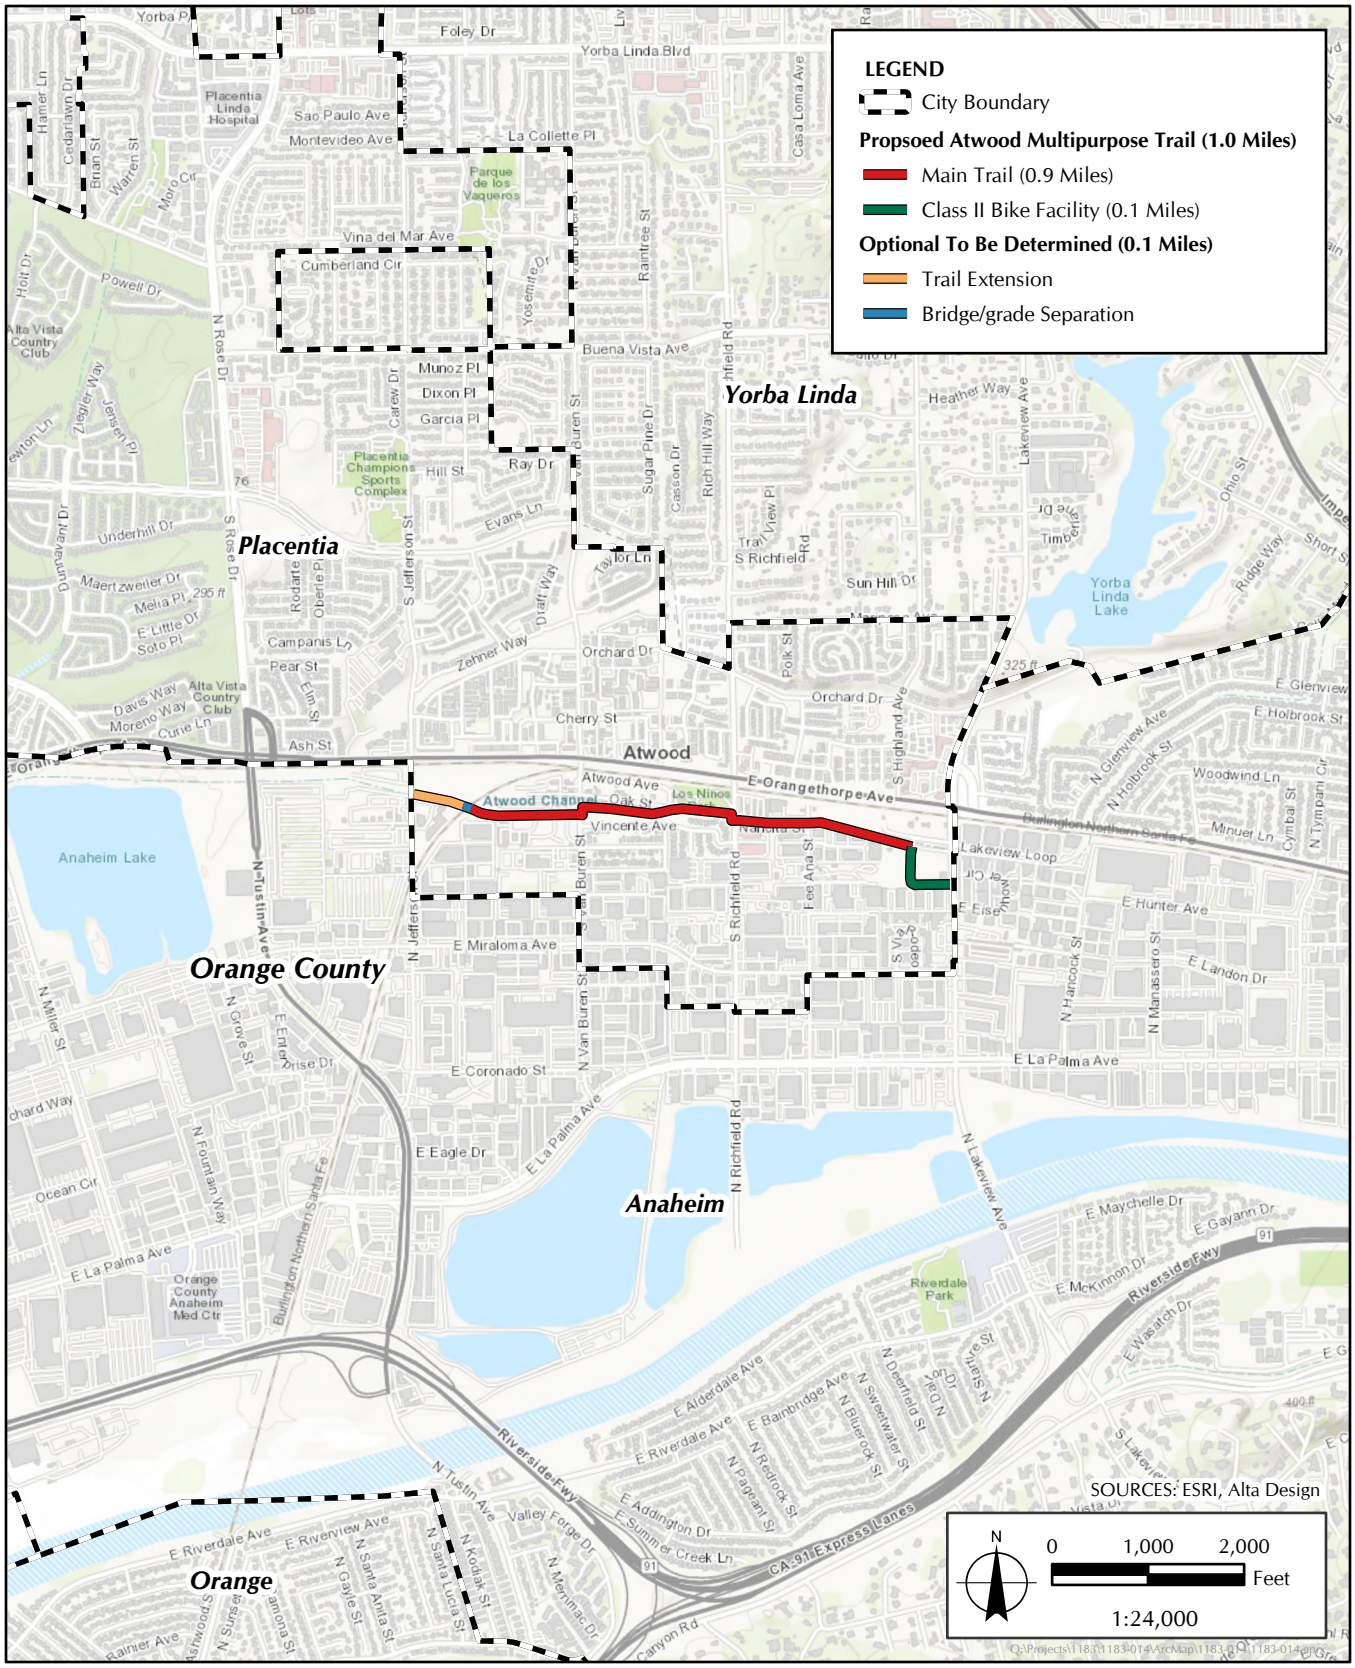

FIGURE 2
Local Vicinity Map
Atwood Multipurpose Trail Project

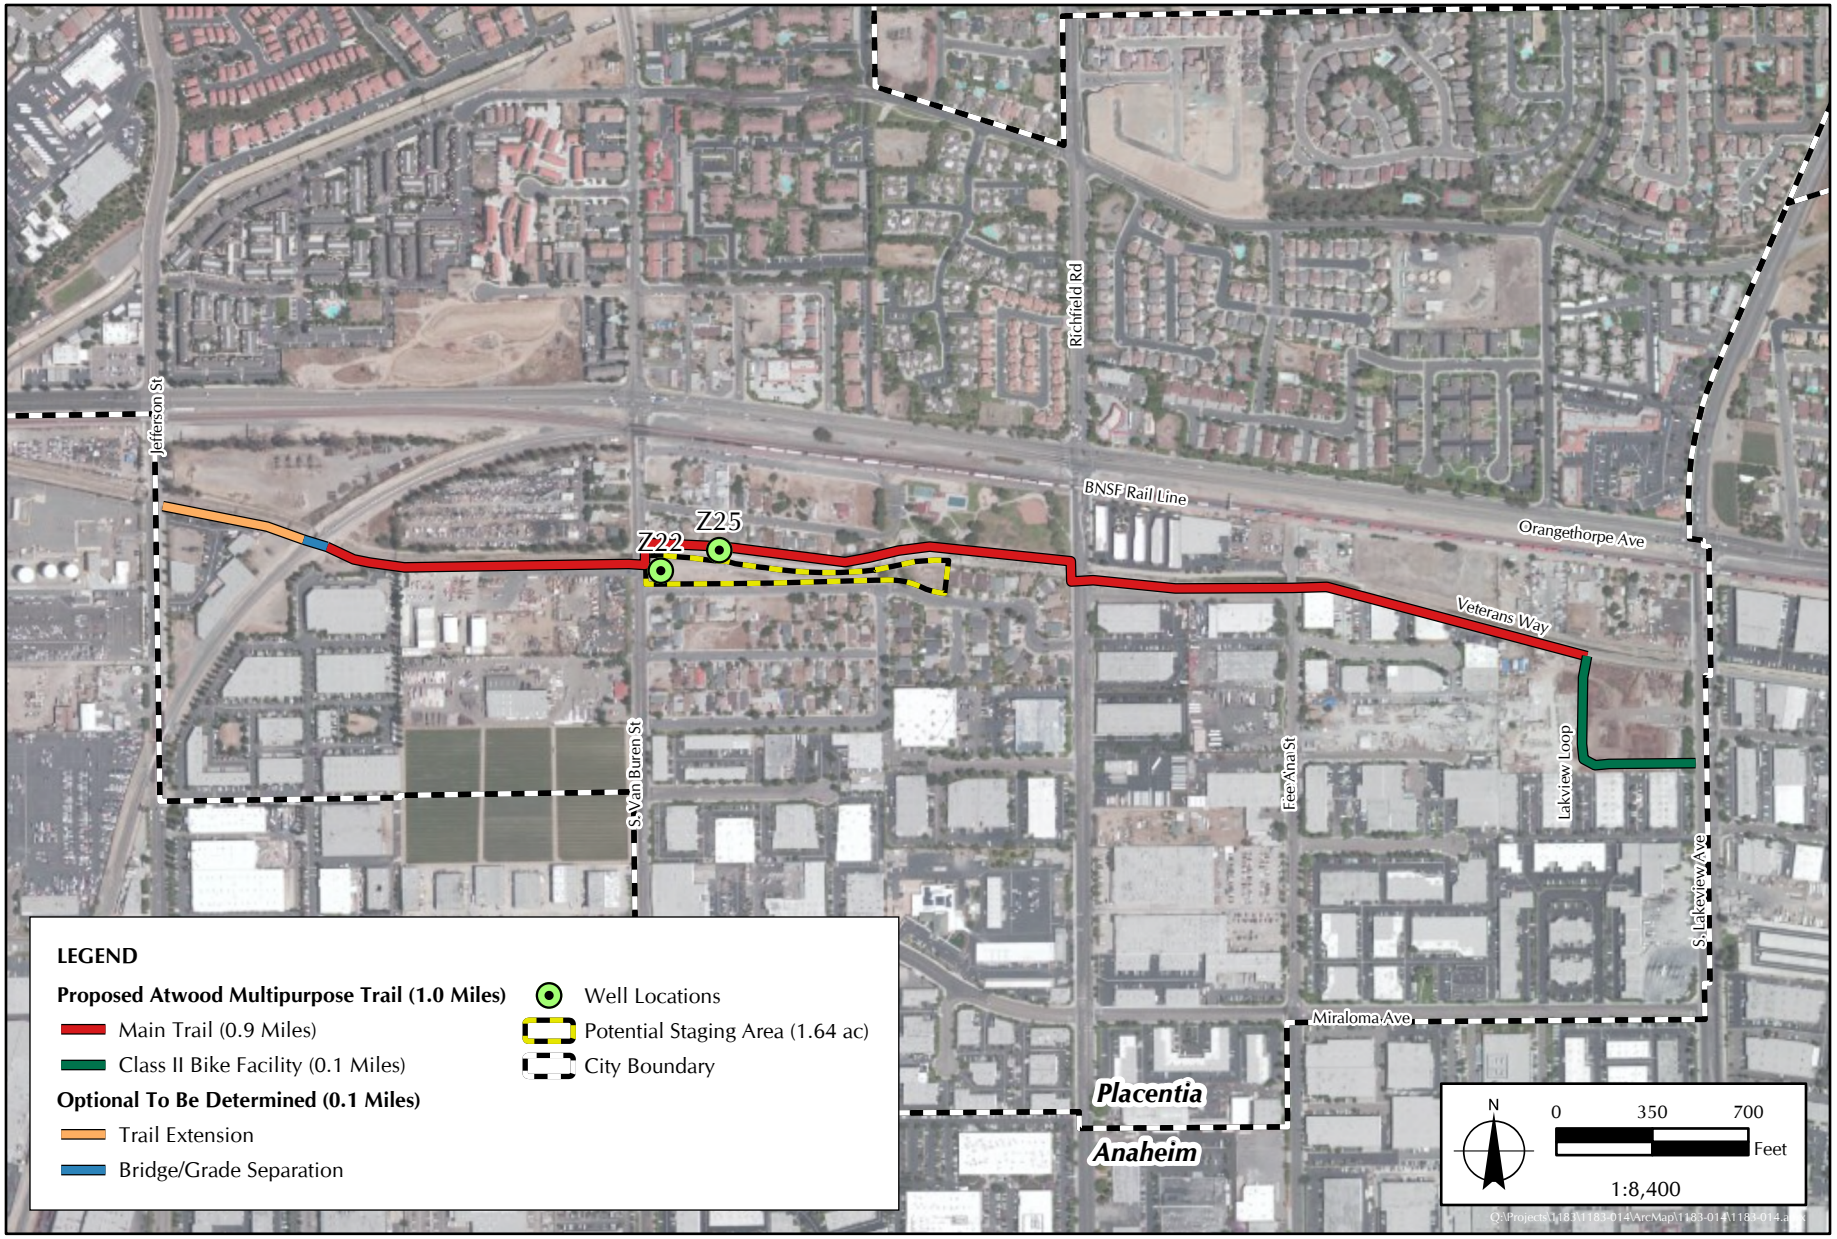

FIGURE 3
Proposed Project
Atwood Multipurpose Trail

Crossing options at intersections, a connection on the eastern end from Lakeview Loop to the Class II bike lane on Lakeview Avenue, and local access points along the trail alignment have been identified to provide residents with connection to residential areas and parks.

The purpose of the proposed project is to incentivize new active transportation users and promote public health by providing residents a dedicated Class I trail with full ADA (Americans with Disabilities Act) accessibility, landscaping enhancements, and amenities. The trail would close gaps in the City's active transportation network and provide access to the current Class III/II bike lanes along Jefferson Street and Lakeview Avenue.

This ISA was completed based on review of publicly available government list of known sources of hazardous materials, prior geotechnical investigations conducted for previous adjacent projects, and a multiday site visit. The services of Environmental Data Resources, Inc. (EDR) were retained to search applicable regulatory agency lists and standard environmental record sources to identify location of potential concern within the American Society of Testing and Materials (ASTM) Standard Practice E 1527-13 minimum search distances (Appendix A, *EDR Report*). The potential for hazardous materials to be present was based on careful review and consideration of available information and expert judgment based on experience with comparable construction projects.

1.2 Purpose

The purpose of this ISA is to outline recognized environmental conditions (RECs) to indicate the extent to which the proposed project has the potential to pose a risk or hazard to people, properties, or the environment located along the Atwood channel or within 0.25 mile of the project area. RECs include, but are not limited to, the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. This ISA has been conducted in accordance with ASTM Standard E 1527-13, "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*,"[2] in order to satisfy 40 Code of Federal Regulations (CFR) Part 312 as required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

1.3 Scope of the Investigation

The scope of this ISA comprises five key tasks:

1. Visual inspection of the accessible portions of the project location and adjacent properties for evidence of existing, potential, or suspected contamination and/or the presence of hazardous substances.
2. Review of local, tribal, state, and federal environmental regulatory databases to assess the potential for the subject property to be considered or affected by potential, known, or suspected hazardous waste sites; contaminated soil, surface water, or groundwater; or leaking underground storage tanks (USTs) within the standard radius from the property as specified by the ASTM Standard E 1527-13.
3. Review of reasonably available historical information, including aerial photographs, fire insurance maps, topographic maps, city directory abstracts, other relevant city and/or county records, previous environmental investigations, and/or ownership records (Appendix A, *EDR Report*).
4. Review of reasonably accessible local building, planning, and/or public works records.
5. Preparation of a report documenting the findings, opinions, and conclusions regarding observed or potential environmental concerns.

1.4 Significant Assumptions

As stated above, this ISA was conducted in general accordance with ASTM E1527-13 to the extent deemed appropriate. This was done to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with the proposed project. Performance in accordance with this standard is intended to reduce, but not eliminate uncertainty with respect to the potential for RECs associated with the proposed project.

1.5 Limitations and Exceptions

This ISA report is intended for the sole use of the City and the OCTA. The services of Sapphos Environmental, Inc. have been performed under mutually agreed-upon terms and conditions. If other parties, outside the regulatory permitting process, wish to rely on this report, they should

[2] American Society for Testing and Materials. 2013. Standard E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

contact Sapphos Environmental, Inc., or Alta Planning + Design so that a mutual understanding and agreement of the terms and conditions of such use can be established prior to their use and reliance of this report and the information it contains.

The findings and opinions presented are relative to the currently scheduled dates of work and should not be relied on to represent conditions at substantially later dates. The opinions included herein are based on information obtained during the study and experience. If additional information becomes available, which might impact environmental findings, Sapphos Environmental Inc. requests the opportunity to review the information, reassess the potential conditions, and modify the opinions stated in this report, if warranted.

Although this assessment has attempted to identify the potential for environmental impacts to the proposed project location, potential sources of contamination may have escaped detection due to (1) the limited scope of this assessment, (2) the inaccuracy of public records, and/or (3) the presence of undetected or unreported environmental incidents. It is not within the scope of this assessment to address issues not included in ASTM E1527-13 such as radon, lead in drinking water, naturally occurring hazardous materials or vegetation, endangered species, wetlands, and so forth. Furthermore, it is not the purpose of this study to determine the degree or extent of contamination, if any, currently at the proposed project location.

Sapphos Environmental Inc., professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made regarding the professional information in this report.

1.6 Special Terms and Conditions

All appropriate inquiry into the prior uses of the proposed project location were made in accordance with good commercial and customary practices in order to identify and analyze RECs constituting existing, past or potential environmental conditions in connection with the proposed project area. There are no special terms and conditions that apply to the preparation of this report.

1.7 User Reliance

This report was prepared by, or under the supervision of, an environmental professional in accordance with ASTM Standard E 1527-13, Appendix X2, Definition of Environmental Professional and Relevant Experience Thereto, Pursuant to 40 CFR 10. No warranty, expressed or implied, is made by Sapphos Environmental, Inc.

This report is intended to serve as a screening device for environmental risk associated with present and past property uses. It should be noted that the degree of examination represented by an ISA is not intended to be used as an exhaustive and comprehensive investigation for every conceivable and possible environmental hazard, and Sapphos Environmental, Inc. does not make any such assertion. No claim is made for the actual existence or nonexistence of hazardous substances at the subject property or adjacent sites. Sapphos Environmental, Inc. makes no representation or warranty regarding the accuracy, quality, or completeness of any information provided by governmental agencies or other third-party entities used in the preparation of this report.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this investigation.

2.1 Site Location

The proposed project is a 1.0-mile trail generally located in the Atwood community of the City (Assessor's Parcel Numbers [APN] 346-162-03, 346-164-19, 346-171-02, 346-013-16, 346-015-04, 346-241-03, 346-241-02, 346-331-09, 346-331-10).

The proposed project is located adjacent to the Atwood Channel between Jefferson Street and Lakeview Avenue in the City of Placentia (see Figure 2). Along Lakeview Loop, the proposed project is located on the street for approximately 0.15 mile of the western and southern portions of the loop until Lakeview Avenue. As the proposed project runs east-west between Jefferson Street and Lakeview Loop, it crosses the north-south South Van Buren Street, Richfield Road, and Fee Ana Street. Additionally, between Jefferson Street and South Van Buren Street, the proposed project is intersected by the Burlington Northern Santa Fe Railway (BNSF) alignment. The proposed project area is bound by Orangethorpe Avenue to the north, Lakeview Avenue to the east, Miraloma Avenue to the south, and Jefferson Street to the west. The project would include two temporary staging areas to be reviewed and confirmed by the City. The staging areas will be used for construction equipment and material storage during construction activities. The staging areas are located within empty lots adjacent to the Atwood Channel Easement and Vincente Avenue between S. Van Buren Street and Benjamin Avenue. The staging areas would be fenced from the public. The proposed project site appears on the U.S. Geological Survey (USGS) 7.5-minute series Orange quadrangle (Figure 4, *Topographic Map*).[3] The project location is gently sloping relatively flat, an elevation range of approximately 240 feet above mean sea level (AMSL) in the west to 263 feet AMSL in the east.

The proposed project site is accessible from State Route (SR) 57, SR 91, and SR 90. From SR 57, the site is accessed by exiting on Orangethorpe Avenue, proceeding east on Orangethorpe Avenue for 2.6 miles until Jefferson Street, and then proceeding south on Jefferson Street for approximately 300 feet to the west entrance of Atwood Channel. From SR 91, the site is accessed by exiting Lakeview Avenue and proceeding north on Lakeview Avenue for approximately 1.1 miles to Lakeview Loop. From SR 90, the site is accessed by exiting on Kellogg Drive, proceeding south on Kellogg Drive for 0.6 mile until Orangethorpe Avenue, proceeding west on Orangethorpe Avenue on for 0.8 mile until Lakeview Avenue, and then proceeding south on Lakeview Avenue for approximately 0.2 mile to Lakeview Loop. The maintenance roads along the Atwood Channel are closed to the public and maintained by OCFCD. There are locked gated entrances at Jefferson Street, the BNSF alignment, South Van Buren Street, Richfield Road, Fee Ana Street, and Lakeview Loop.

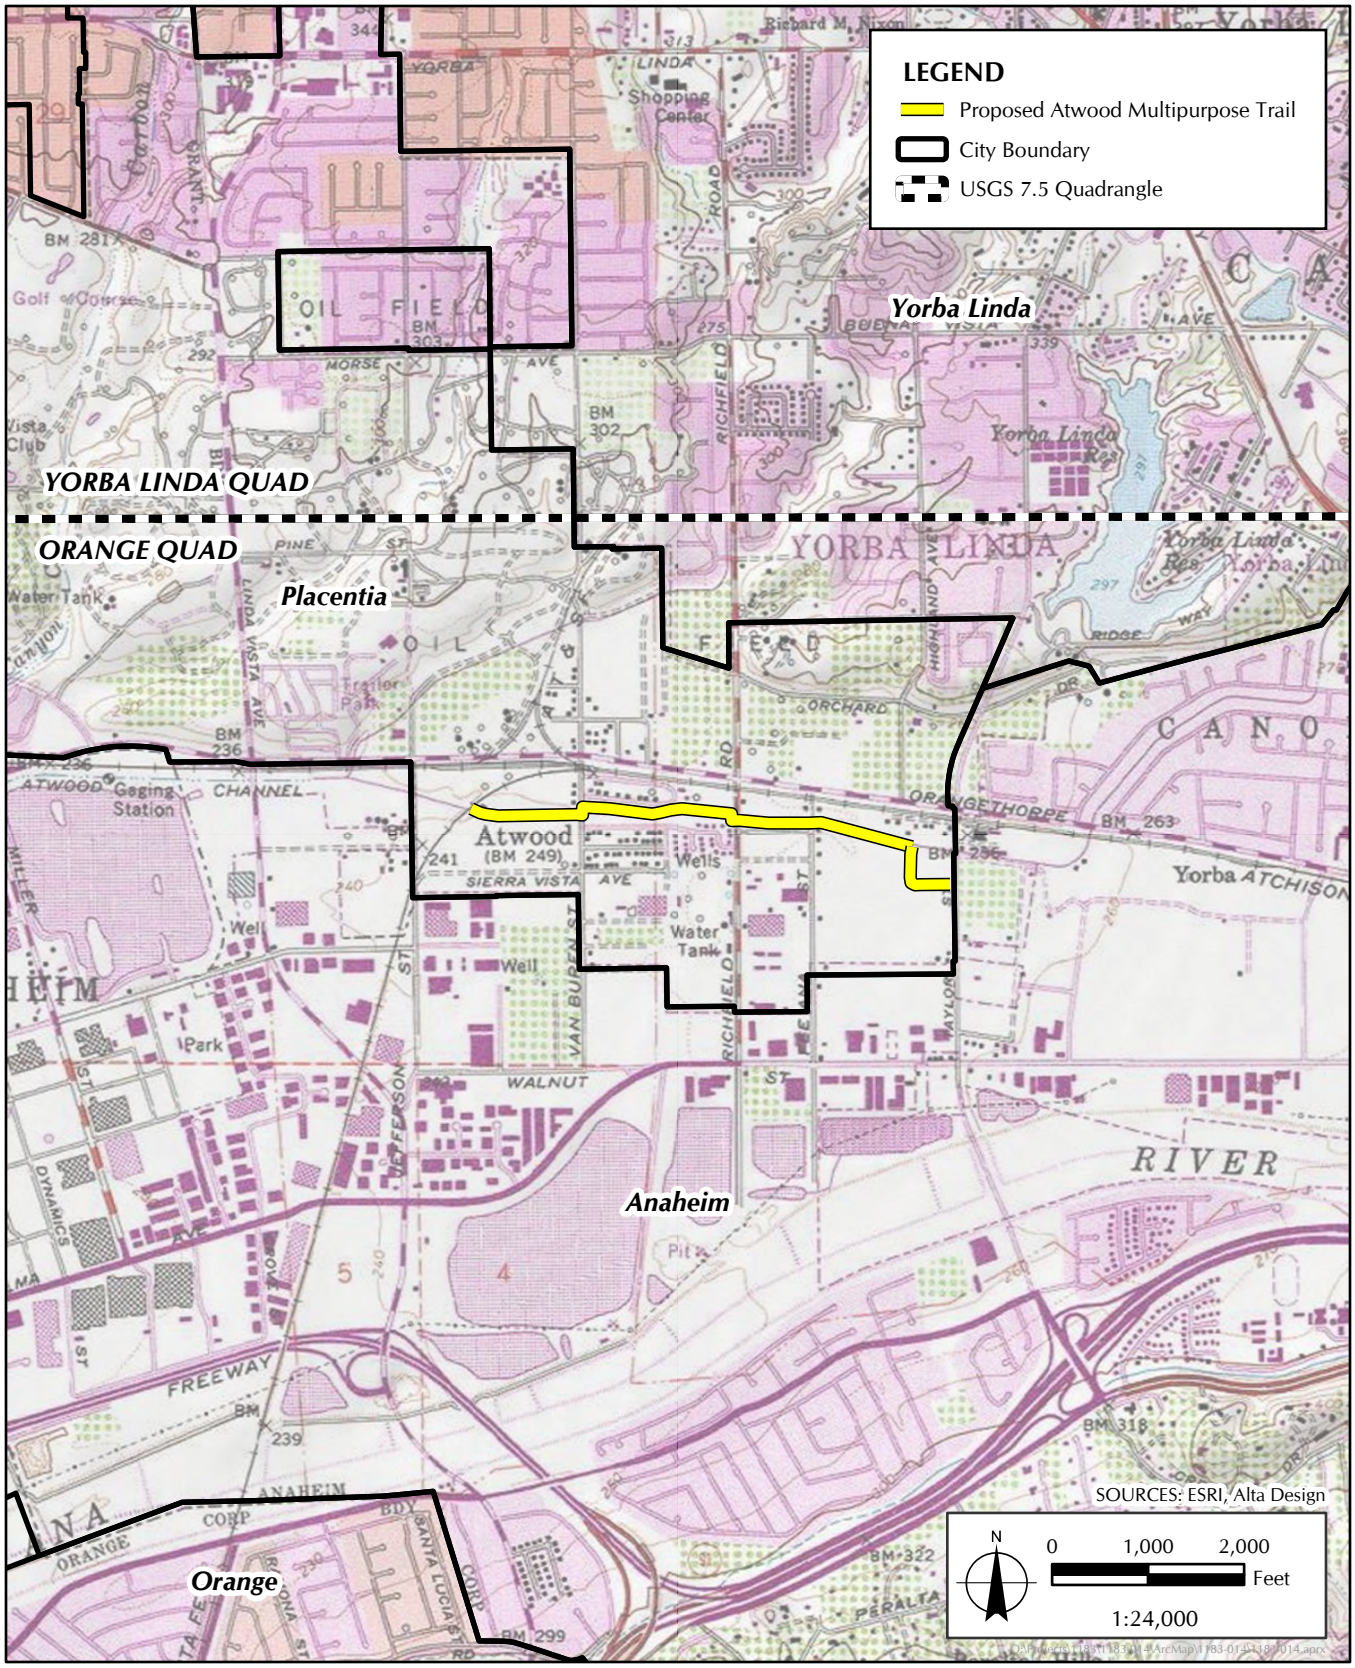

FIGURE 4
Topographic Map
Atwood Multipurpose Trail Project

2.2 Site Characteristics

The OCFCD access roads that characterize most of the proposed project site are vacant, street level, paved gravel paths located immediately adjacent to the Atwood Channel. The Atwood Channel is a flood control channel operated by OCFCD that flows from west to east.[4] The channel is a regulatory floodway that contains stormwater flows from 1 percent annual chance flood discharge. The Federal Emergency Management Administration (FEMA) Flood Maps designate the channel and access roads as Zones A and AE, the zones used for the 1 percent annual chance floodplains. The Flood Maps designate the portion of the proposed project on the street at Lakeview Loop as Zone X, an area with reduced flood risk due to levee or other structure.[5] OCFCD owns and maintains the channel under the OC Operations and Maintenance of OC Public Works.[6,7] Lakeview Loop is a local street within the City Department of Public Works right-of-way.

The area immediately surrounding the channel is highly developed and is mostly characterized by industrial uses, residential buildings, and a public park. The proposed project site is designated in the Placentia General Plan as Industrial between Jefferson Street and South Van Buren Street; Low Density Residential between South Van Buren Street and Richfield Road; and Industrial, High Density Residential, and Commercial-Manufacturing between Richfield Road and Lakeview Avenue (Figure 5, *General Plan Land Use Designation*). The surrounding land use designations are Industrial, Commercial-Manufacturing, High Density Residential, Low Density Residential, and Parks.[8]

The proposed project alignment is directly adjacent to the surrounding land uses (industrial, park, houses), separated by fences or the wall of the building.

Based on site visits conducted on January 13, 20, and 25, 2022, the Atwood Channel is an engineered, trapezoidal channel with both earth and concrete walls with minimal vegetation. At the time of the site visits, the channel was mostly dry with sporadic instances of standing or lightly flowing water. The channel is diverted under streets via concrete culverts, eventually flowing into the Santa Ana River via Anaheim Lake and the Carbon Canyon Diversion Channel approximately 0.9 mile west of Jefferson Street.

---

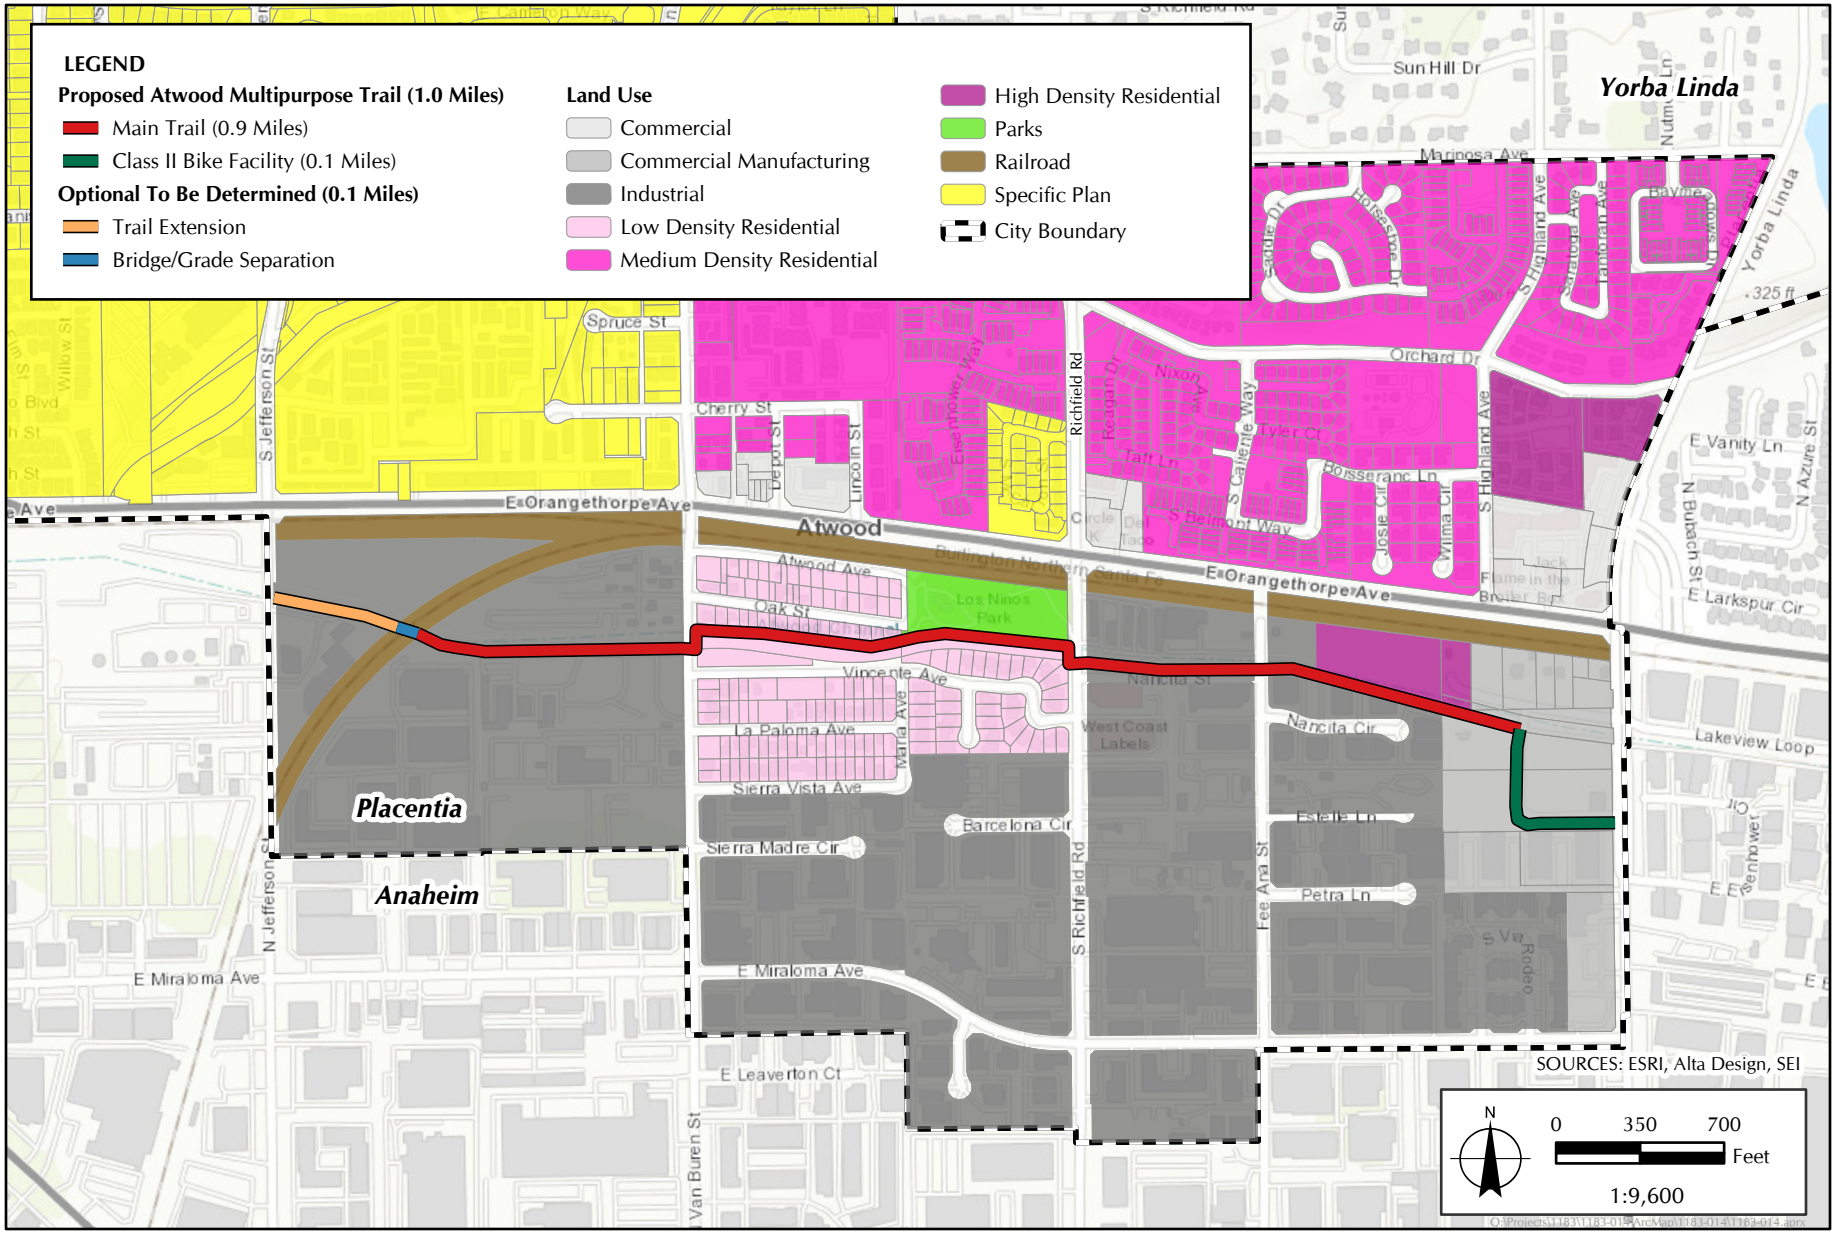

FIGURE 5
General Plan Land Use Designations
Atwood Multipurpose Trail Project

The Atwood Channel is classified by the National Wetlands Inventory (NWI) as a Riverine habitat (R4SBCr) (Figure 6, *National Wetlands Inventory*) and is classified by the United States Forest System vegetation classification system, Calveg, as Urban (Figure 7, *Plant Communities*).[9] The Riverine System includes all wetlands and deepwater habitats contained within a channel, with two exceptions: (1) wetlands dominated by trees, shrubs, persistent emergents, emergent mosses, or lichens; and (2) habitats with water containing ocean-derived salts of 0.5 parts per trillion or greater. A channel is an open conduit either naturally or artificially created which periodically or continuously contains moving water, or that forms a connecting link between two bodies of standing water. This Subsystem includes channels that contain flowing water only part of the year. When the water is not flowing, it may remain in isolated pools or surface water may be absent. Surface water is present for extended periods especially early in the growing season, but absent by the end of the growing season in most years. The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface. This Modifier describes concrete-lined drainage ways, as well as Rock Bottom, Unconsolidated Bottom, Rocky Shore, and Unconsolidated Shore where the substrate material has been emplaced by humans. Based on site visits, the channel between Jefferson Street and Lakeview Loop is characterized by both.

2.3 Site Surveys

Site reconnaissance surveys of the proposed project area were conducted on January 13, 20, and 25, 2022, by technical staff to establish the existing conditions, identify potential RECs, and supplement the Natural Environment Study (Minimal Impacts) prepared for the project. The site visits were conducted by walking the entire length of the proposed project area. Photos were taken to document site conditions (Figure 8, *Site Photographs*). The proposed project area is within a highly disturbed and developed portion of the City. The ground level areas are characterized primarily by industrial and commercial industrial to the north and south of the proposed trail alignment, except between South Van Buren Street and Richfield Road, where it is completely characterized by low-density residential and parks to north and low-density residential to the south; and between Fee Ana Street and Lakeview Loop, where there is one high-density residential development.

3.1 Prior Investigations

There were no prior environmental investigations found for the project site. There have been geotechnical investigations performed on adjacent properties for the following projects constructed within the City near the proposed project location.

Alta Vista and Rose Drive Development. On June 12, 2018, the Planning Commission approved the development of an approximately 8.45-gross-acre, unimproved site with an approximately 10,500-square-foot, single-story commercial retail building and 54 detached single-family homes located on the southeast corner of Alta Vista Street and Rose Drive. Two commercial buildings are being developed on the 1.99-acre lot located at the northwest corner of the project site along Rose Drive and Alta Vista Street. Outdoor dining areas will be provided adjacent to the building store fronts and a 95-space parking lot located to the south of the buildings that will be accessible by two driveways along Rose Drive and Alta Vista Street. The purpose of this investigation was to evaluate the general subsurface soil conditions at the project site and provide geotechnical recommendations for the design and construction of the proposed Development. Construction is anticipated to be completed by December 2022. The geotechnical investigation was completed in September 2017.

Placentia Crowther Project at 110 and 132 E. Crowther Avenue. The 2.95-acre project site is located in the City, approximately 0.4 mile east of SR 57 and 1.3 miles north of SR 91 in northern Orange County. The residential facilities include 215 multi-family residential dwelling units as well as related amenities such as two landscaped courtyards, a 6-story/7-level parking structure, a pool/club house and fitness center located on the rooftop terrace of the parking structure, a dog run, spa, pedestrian walkways, and extensive landscape. Construction was completed in January 2020. The geotechnical investigation was completed in August 2017.

Latitude Residential Project – 443, 449, 455, & 461 S. Van Buren Street. The 5.8-acre project site consisted of land that was occupied by a commercial facility operating as an auto salvage wrecking yard. The former auto wrecking facility site was developed to a High-Density Residential site with 139 for-sale residential townhome units. The project site is bounded to the north and northwest by railroad tracks and bounded to the east by single-family residences and Van Buren Street. The geotechnical investigation was completed in August 2017.

Santa Angelina Senior Apartment Homes – 1314 N. Angelina Drive. The project included the development of 65 senior apartment homes in two-story residential buildings and ground-level parking. The site is located at 1314 North Angelina Drive within the City. The property is bordered by single-family residences to the north and east, Morse Avenue to the south, and North Angelina Drive to the west. The geotechnical investigation was completed in January 2020.

Crowther Sewer Pipeline Project. The Crowther Sewer Pipeline project is approximately 7,300 linear feet of polyvinyl chloride pipeline underground, located within the Cities of Placentia and Fullerton in Orange County, California. The pipe originates from the intersection of West Crowther Avenue and South Bradford Street, then traverses west along West Crowther Avenue to the intersection with South Placentia Avenue. The pipeline crosses the SR 57 freeway and the Orange County Public Works storm drain channel. From the intersection of West Crowther Avenue and South Placentia Avenue, it travels south to the intersection with East Orangethorpe Avenue and crossing the BNSF railway track. Finally, it travels west along East Orangethorpe

Avenue to tie into Orange County Water District's Newhope Placentia trunk sewer. The geotechnical report was completed in October 2018.

Vulnerability Assessment for City General Plan Update. A vulnerability assessment was conducted as part of the proposed General Plan to identify potential hazards affecting the City. The Safety Element of the proposed General Plan documents and assesses how natural and human-induced hazards are present within the City, and these hazards may adversely affect members of the community.

The EDR historical database search, State Water Resources Control Board (SWRCB) database (GeoTracker), and the California Environmental Protection Agency Department of Toxic Substance Control (DTSC) database (EnviroStor) were also reviewed.

Based on these reviews, no other hazardous materials investigations have been performed at the proposed project site.

3.2 Historical U.S. Geological Survey Topographic Maps

Historical USGS topographic maps of the project site were reviewed for the years 1896, 1898, 1901, 1902, 1932, 1935, 1942, 1949, 1950, 1964, 1972, 1974, 1981, 2012, 2015, and 2018 (Appendix A).

1896, 1898, 1901, 1902

A review of these maps indicates the project site was located in the center of an early undeveloped area known as Richfields near the former San Diego and Arizona Railroad and Santa Fe Railroad. The undeveloped area was located north of the Santa Ana River including a former floodplain that extended to the west. A road network is observable traversing the project area and expanding over the years. There were no observable buildings.

1932, 1935, 1942

The City was incorporated in 1926. During the years 1932 and 1942, development of the roadway network in the area began to be established. Several residential/ranch communities appeared, and orchards were established by 1942. In 1932, the community of Atwood was established, and an electrical transmission line appeared south of the proposed project site south of the railroad tracks. Development continued to increase, with several new streets surrounding Atwood and below the Santa Ana River. Several residential or ranch houses were developed surrounding the oil wells north of the railroad tracks and the proposed project site.

1949, 1950, 1964

In 1949, SR 91 was constructed south of the proposed project site. In 1964, the associated ramps and connectors were built to the adjacent freeway. Oil wells are visible and were located north of the project site and railroad tracks. The oil wells expanded to an oil field in 1964. There were several water tanks located adjacent to residential neighborhoods surrounding the proposed project site. Recreational opportunities including the Alta Vista Golf Club and parks were located west of the proposed project site.

1972, 1974, 1981, 2012, 2015, 2018

There were no notable changes to the proposed project area or immediate surrounding in this timeframe. There were additional roadway network improvements and increases in residential properties. The oil field remains visible until 2012. There were no other changes to the general area, and there were no existing oil and gas facilities visible or identified from the topographic maps within the project site.

3.3 Historical Aerial Photographs

Historical aerial photographs of the proposed project site within the City were reviewed for the years 1938, 1946, 1952, 1963, 1966, 1972, 1977, 1985, 1989, 1990, 1995, 2002, 2005, 2009, 2012, and 2016 (Appendix A).

1938, 1946, 1952

The aerial photos show the Atwood Channel is undefined and the surrounding parcels are undeveloped. Construction of SR 91 and associated ramps and connectors to the adjacent freeway was completed. The outline of the railroad is defined stretching from west to east, north of the project site.

1963, 1966, 1972, 1977, 1985, 1989

In 1963, the aerial photos show a defined Atwood Channel and disturbed ground within the proposed project area. The appearance is indicative of deposits from a perennial stream with high seasonal flows. Within the immediate area, there are residential communities developing within Atwood north and south of the channel. The outlines of Atwood Channel appear to be engineered, but not concrete lined. The adjacent BNSF is evident north of the proposed project site. From 1963 to 1972, the parcels adjacent to the proposed project site are converted from agricultural to residential and commercial properties. By 1985, the residential communities have expanded in size surrounding the proposed project site.

1990, 1995, 2002, 2005, 2009, 2012, 2016

There were no notable changes to the proposed project area or its immediate surroundings in this timeframe, with the exception of increased residential growth.

3.4 Historical Sanborn Fire Insurance Maps

Historical Sanborn Fire Insurance Maps of the proposed project site and vicinity are not available (see Appendix A).

3.5 User Questionnaire

During this investigation, the request for information pertaining to the questions, *User Questionnaire*, of ASTM Standard E 1527-13, was not used based on the results from the EDR report, RWQCB GeoTracker, and DTSC EnviroStor database available information.

3.6 Title Records

A preliminary title report was not available or provided to Sapphos Environmental, Inc. The proposed project site is operated and maintained by OCFCD.

3.7 Environmental Liens or Activity and Other Use Limitations (AUL)

A search for AULs on the DTSC website did not reveal AULs in connection with the proposed project area.

3.8 City Directory Image Reports

The EDR City Directory Image Report (Appendix A) is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. City directories generally include listings of residents or businesses organized both alphabetically and alphanumerically by street names and street addresses and are prepared for many urban and suburban areas of the United States dating back to the early 1900s.

The City Directory Image Report of the project site and adjacent properties were reviewed for the years 1973, 1976, 1982, 1987, 1992, 1995, 2000, 2005, 2010, 2014, and 2017 (Appendix A). The City Directory provides the uses for adjoining property addresses of the target property (proposed project site), however, the address for the target property itself (Atwood Channel from Jefferson Street to Lakeview Avenue) was not identified.

According to the City directories, addresses in the vicinity of the proposed project site were made up of residential and commercial properties from 1973 to 2017. The site address, the Atwood Channel, is not listed in the City Directory Image Report.

4. ENVIRONMENTAL SETTING

4.1 Topography

The proposed project area is located in the central portion of the City. The City is located on gently sloping land within the foothills of the eastern Peninsular Ranges geomorphic province. The City is bound by the Chino Hills to the near north and east, the Santa Ana Mountains to the east and south, and the Los Angeles basin to the west. Despite the City's location in the foothills, the topography of much of the City is relatively flat, with 68 percent of land incorporated in 1973 identified as having slope of less than 3 percent. Areas with steep slopes are identified along both Carbon Creek and the Santa Ana River. The project location is gently sloping, with an elevation range of approximately 240 feet AMSL in the west to 263 feet AMSL in the east.

4.2 Seismic Risks

The City is located in seismically active southern California, as are most southern California cities. Active and potentially active faults are located adjacent to Placentia; however, there are no Alquist-Priolo (AP) Earthquake Fault Zones within the City limits. The California Geological Survey defines active and potentially active faults in the AP Earthquake Fault Zoning Act.[10] For the purpose of the Act, active and potentially active faults are respectively defined as those that have ruptured during the last ~11,000 years and those that have ruptured in the last ~ 1.5 million years. Maps of Earthquake Fault Zones have been published by the California Geological Survey in accordance with the AP Special Studies Zone Act, 1994, which regulates development near active faults.

Although the City does not lie within an AP Zone, seismic risk is still considered high because of the proximity to other active AP faulting in the region. The Yorba Linda seismic source zone is a group of faults located approximately 0.3 mile northeast of the City and is capable of producing a magnitude 6.4 earthquake. Although ground rupture is not considered to be a major concern for the City, it is still likely that the City will be subject to some moderate to severe seismic shaking. Some degree of structural damage due to stronger seismic shaking should be expected, but the risk can be reduced through adherence to seismic design codes included in the California Building Code 2016.

4.3 Hydrogeology

The hydrogeology beneath the project site is dominated by sediments that have been derived from the nearby Santa Ana Mountains. The details are discussed below in Section 4.3. The EDR report (Appendix A) provides data from the groundwater wells near the proposed project site. While not all groundwater wells provided depth to groundwater, those that did ranged from approximately 54 to 111 feet below the surface within 0.25 mile of the proposed project site. Ground water recharge occurs from rainfall runoff from the Santa Ana Mountains and the nearby Santa Ana River. The natural groundwater flow direction beneath the site is to the west and south.

[10] California Department of Conservation. 2005. Seismic Hazard Zone Report for the Yorba Linda 7.5-Minute Quadrangle, Los Angeles, Orange and San Bernardino Counties, California. Quaternary Geologic Map of the Yorba Linda 7.5-Minute Quadrangle, California. Modified from Yerkes (1972; north half) and Tan and other (1984; south half).

4.4 Soils

Native site soils consisting of late Pleistocene to Holocene-age older fan deposits were encountered beneath the fill soils in previous geotechnical investigations near the proposed project site.[11] The older fan deposits in the area are characterized as unconsolidated sand, silt, and clay deposits associated with the lowlands of the Santa Ana River and Carbon Creek. The on-site fan deposits consist of medium dense to very dense sands with gravel, clayey sands, silty sands, sands, and sands with silt; and stiff to hard clayey silts, clayey silts with sand, silts, silts with sand, silts with clay, sandy silts with clay, sandy silts, silty clays, silty clays with sand, and sandy clays.[12]

Soil liquefaction is a seismically induced form of ground failure, which has been a major cause of earthquake damage in Southern California. Liquefaction generally occurs during significant earthquake activity, and structures located on saturated granular soils such as silt or sand may experience significant damage during an earthquake due to the instability of structural foundations and the moving earth. Soils most susceptible to liquefaction are saturated, loose, uniformly graded, fine-grained sand deposits. The proposed project site is located in an area characterized as having a moderate liquefaction potential. [13]

The EDR report (Appendix A) provides information on the proposed project site's soils from the U.S. Department of Agriculture's National Cooperative Soil Survey. The soils are classified as loamy sand and loam. The loamy sand has high infiltration rates and is comprise of deep, well-drained to excessively drained sands and gravels. The loam has moderate infiltration rates and is comprised of deep and moderately deep soils with moderately coarse textures that drain well to moderately well.

5. SITE INSPECTION

5.1 Summary

Site inspections were performed on January 13, 20, and 25, 2022, by walking the entire length of the project site area (see Figure 8 for site photos).

The purpose of the site reconnaissance was to observe the present site use and conditions as they relate to the possible presence of potentially hazardous substances and petroleum products. In addition, adjoining properties and roads were visually observed from the project site to identify land uses and the potential presence of structures, operations, activities, or environmental conditions that may involve the use, treatment, storage, disposal, or generation of hazardous wastes and/or petroleum products that may pose an environmental concern to the project site.

5.2 Identified Chemicals

At the time of the site inspection, there was no evidence of the use or storage of chemicals at the proposed project site, along the access roads adjacent to the channel or along Lakeview Loop.

5.3 Area-Specific Observations

The site is currently closed to the public, with trespassing signage and chain link fences locked by OCFCD. The residences directly adjacent to the channel are separated from the access road by various methods including wood fencing, chain link fencing, and brick or concrete walls. Some residences have access to the access roads and channel. There is little vegetation along the proposed trail alignment, primarily cactus plants along the residential walls and fences.

There were no visible pipelines at or adjacent to the proposed project site. Multiple pipes were observed crossing Atwood Channel. Field personnel were unable to ascertain the contents of these pipes, but they are likely associated with the oil and gas facilities. Electric utilities and stormwater infrastructure present at the proposed project site do not pose an environmental concern.

The proposed project area is characterized by several active oil well pumping facilities near the proposed project area and one pumping facility located on the project site and within the proposed staging area. These facilities are fenced, and access is restricted. One pumping facility is located directly on the proposed trail alignment less than 300 feet east of the South Van Buren Street entrance. The pumping facility is completely fenced and restricted with barbed wire. All oil well facilities are inaccessible to the public. At the time of the site inspections, there was no evidence of oil spills or storage at these facilities. The proposed trail would be designed to avoid the pumping well, and it would remain inaccessible to the public by chain link fence and barbed wire. This oil well facility should be considered an REC, and appropriate measures should be taken to avoid public exposure to the oil well.

The properties adjacent to the project site were also observed to assess the potential for RECs to be present. The residential and park land uses do not represent RECs. The surrounding industrial and commercial manufacturing uses are separated from the proposed alignment by chain link fencing and/or the walls of buildings. Most of the industrial and commercial manufacturing buildings directly adjacent to the proposed alignment are kept clean in appearance and blocked from view of the operations by the warehouse walls. There is one industrial yard

south of the channel between South Van Buren Street and the BNSF alignment that is not blocked from view. Operations are separated from the channel access road by a 25-foot paved driveway and then blocked from view by concrete walls. Industrial equipment and vehicles are visible, but the area is kept clean in appearance.

No hazardous materials were observed to be stored on this property.

6. GOVERNMENT RECORDS REVIEW

6.1 Federal, State, Local, and Tribal Environmental Regulatory Databases

EDR searched applicable regulatory agency lists and standard environmental record sources to identify locations of potential concern within the ASTM Standard Practice E 1527-13 minimum search distances. The EDR report includes two maps, one with concentric ellipses indicating the search distances of 0.25, 0.5, and 1.0 mile from the center of the target property alignment and the other zoomed into the search distance of 0.25 mile from the center of the target property alignment. The EDR package includes certified Sanborn Fire Insurance Maps, historical aerial photographs, historical topographic maps, a city directory, high-risk historical records, and recovered government archives (Appendix A).

The EDR Report Radius Map presents a detailed description and listing of the federal, state, local, and tribal databases searched by EDR and the number of sites that were identified at various distances. The EDR Report Radius Map identified industrial and light industrial sites within the vicinity of the project site. Consideration of contamination for properties within a 0.25-mile radius of the site is required pursuant to the California Environmental Quality Act (CEQA). There are 322 sites listed in the EDR database within 0.25 mile of the proposed project, but none of these were found to pose a hazardous waste concern to the proposed project based on the following criteria:

- The sites do not pose hazardous concerns as they are records of past projects such as dredge/fill sites or maintenance projects.
- The site is listed to maintain records but has no history of violations.
- The regulatory case status of the property is not identified as active.
- The listing was at a lower elevation that the proposed project site and is down-gradient.
- The release was in nominal amounts or concentrations that do not present a hazardous waste impact concern to the project site.
- The listing was identified on low-hazardous risk databases (i.e., UST Hazardous Waste Information System Database [HAZNET], small quantity generator databases) with no reported spills, cleanups, or violations.
- The property is identified on a low-hazardous risk database as receiving one or more violations, but the nature of violations received was associated with financial, administrative, or record-keeping practices only.
- The distance of the listing to project limits is great enough that it does not present a hazardous waste impact concern to the project.

Based on these criteria, these listings are not considered an environmental concern to the proposed project and were not evaluated further.

There were 14 sites found by the EDR database directly on the proposed alignment. None of these sites were found to pose a hazardous waste concern based on the following criteria, or a combination thereof:

- The sites do not pose hazardous concerns as they are records of past projects such as dredge/fill sites or maintenance projects.
- The site is listed to maintain records but has no history of violations.
- The regulatory case status of the property is not identified as active.
- There are no historical automobile or historical cleaner uses mapped directly on the proposed alignment.

The GeoTracker database did not identify any sites within the project property. The GeoTracker database identified two sites under open assessment of cleanup within 0.25 mile of the proposed project. Other sites within 0.25 mile were closed cases.[14]

- Exxon Mobil Atwood Terminal, 1477 Jefferson St., Anaheim, CA 92807: Soil excavation has been completed. Groundwater monitoring is ongoing.[15] This does not pose a constraint on the development of the proposed project.
- PBF Energy Atwood Terminal (Formerly Mobil), 1477 N. Jefferson Street, Anaheim, CA 92807: Initial excavation and vapor extraction is complete. Groundwater monitoring is ongoing for open assessment.[16] This does not pose a constraint on the development of the proposed project.

The EnviroStor database did not identify any sites within the project property. The EnviroStor database identified one active site within 0.25 mile of the proposed project between South Van Buren Street and the BNSF alignment:

- Placentia (Van Buren & Orangethorpe), 443, 449, 455, 461 South Van Buren Street, Placentia, CA 92870: The site was under voluntary cleanup for metal reclamation and recycling.[17] Based on site visits, the soil excavation and redevelopment of the site is currently under way. This does not pose a constraint on the development of the proposed project.

A review of the EDR package, GeoTracker, and EnviroStor databases indicated no RECs that would constrain the development of the proposed project.

An inspection for lead-based paints (LBPs), aerially deposited lead (ADL), and asbestos-containing material (ACMs) was not included in this assessment. However, LBPs, ADLs, and ACMs may occur in pre-1970s buildings in the area and on the proposed alignment. LBPs, ADLs, and ACMs can be removed safely using standard removal protocols that would not constrain the development of the proposed trail. The proposed project does not require demolition of any structures; thus, it would likely not require LBP, ADL, or ACM surveys.

6.2 Regulatory Agency Records

SWRCB

Available files through the online GeoTracker database maintained by the SWRCB were reviewed. GeoTracker maintains files related to UST facilities, leaking underground storage tanks (LUSTs), site cleanups, disposal sites, wells, and information related to hazardous materials and/or waste.

The project site was not identified on the GeoTracker database. No other adjacent or surrounding properties that warranted further assessment were identified on the GeoTracker database. No RECs were identified as a result of the GeoTracker database review.

DTSC

Available DTSC files published on EnviroStor were reviewed. The purpose of this search was to identify any evidence of unauthorized releases of hazardous materials to the surface, subsurface soil, and groundwater at the proposed project area. The search was also intended to identify properties within 0.25 mile of the proposed project at locations that, based upon proximity or location relative to regional groundwater flow, would be considered of environmental concern to the project.

The project site was not identified on the EnviroStor database. No adjacent or surrounding properties that warranted further assessment were identified on the EnviroStor database. No RECs were identified as a result of the EnviroStor database review.

California Geologic Energy Management Division (CalGEM)

Available maps on the CalGEM website for oil and gas wells on or in the vicinity of the project were reviewed.

The proposed project site is located in the Richfield oil and gas field. There are numerous oil and gas wells within 0.25 mile of the proposed project site, including pumping facilities. There is one pumping well (Well #Z25, API #0405906048) located directly on the proposed trail alignment less than 300 feet east of the South Van Buren Street entrance. There is an additional facility (Well Z22, API 0405906312) located on the proposed staging area for the project (Figure 3). Both are identified on the CalGEM website as active oil and gas wells operated by West Energy Operating, LLC.[18]

The most recent inspection report for the wells does not identify any violations related to poor conditions, spills, improper covering, faulty fencing or barbed wire, or damaged enclosure.[19] The only current violation is that the signage does not have the correct operator's name. The signage states that well #Z25 is operated by Greka; however, it is now operated by West Energy

[18] California Department of Conservation, Geologic Energy Management Division (CalGEM). N.d. Well Finder. https://maps.conservation.ca.gov/doggr/wellfinder/#openModal/-117.82939/33.86648/18 (accessed March 28 and July 13, 2022).

[19] California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR). October 11, 2019. Notice of Violation – Violation I.D. 11183273 through 11183493.

Operating, LLC. This does not pose a constraint on the proposed project.

The pumpjacks are completely fenced by chain link fence and barbed wire and are inaccessible to the public. At the time of the site inspections, there was no evidence of oil spills or storage at the pumpjack. The proposed trail would be designed to avoid the pumpjack, and it would remain inaccessible to the public by chain link fence and barbed wire.

Well #Z25 and the facility (Well Z22) located on the proposed staging area property will be considered as RECs, and further recommendations are discussed below. No other RECs were identified as a result of the CalGEM database review.

U.S. Department of Transportation (USDOT)

Available files through the online National Pipeline Mapping System (NPMS) database maintained by the USDOT were reviewed. NPMS is a geographic information system (GIS) database of pipeline information for the specific intent of emergency response. The mapping application is design to display data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks.

The database identified an active Southern California Gas Company natural gas transmission pipeline that crosses the proposed alignment where it runs beneath the BNSF alignment. Additionally, the database identified a hazardous liquid pipeline that runs beneath a portion of the proposed trail alignment between South Van Buren Street and Richfield Road. The database identifies the pipeline as a permanently abandoned empty liquid pipeline for crude oil gathering. No liquid accidents or gas incidents were identified by the database.[20]

These do not pose RECs as a result of the NPMS database review.

6.3 Local Department Records

A request for public records on hazardous waste, spills, or accidents was made with the City, City Fire Department, Orange County Executive Office, Orange County Recycling and Waste, Orange County Environmental Health Division, and Orange County Public Works under the Freedom of Information Act. The City and the Fire Department responded that they did not maintain records responsive to this request. The Orange County Executive Office was unable to provide records because the Atwood Channel is not associated with a physical address. Orange County Recycle and Waste responded that they do not have records responsive to the request because the subject parcels are not located on or adjacent to any active or closed landfill sites currently or historically. The Orange County Environmental Health Division and Public Works Department did not respond to the request for public records.

6.4 Data Gaps

In general, a data gap is the inability to gather information as prescribed in the ASTM Standard Practice despite good faith efforts. This may include, but not be limited to, a lack of historical information, inability to interview knowledgeable individuals, or inspect portions of the proposed project site. No data gaps were identified during the course of this assessment.

[20] U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration. N.d. National Pipeline Mapping System (NPMS). https://pvnpms.phmsa.dot.gov/PublicViewer/ (accessed March 28, 2022).

6.5 Data Failures

The objective of reviewing historical information is to identify all obvious uses of the project site from first developed use or 1940, whichever is earlier, in order to identify the likelihood of previous uses resulting in a recognized environmental condition(s). Generally, a data failure is when all obvious uses of a site cannot be determined despite gathering and reviewing all of the standard historical sources that are reasonably ascertainable. A historical source is considered reasonably ascertainable if it is (1) publicly available, (2) obtainable within a reasonable period of time and at a reasonable cost, and (3) practically reviewable.

The uses at the proposed project area were identified back to 1896. Therefore, data failure was not encountered during the course of this assessment.

7. SUMMARY OF FINDINGS AND RECOMMENDATIONS

7.1 Findings

The information procured during this investigation was used to identify, to the extent practical and within the limitations of the scope, RECs associated with the project site due to current or past land use. This assessment has revealed evidence of two RECs (Oil Well #Z25 and Well Z22 located on the proposed staging area). These facilities revealed no historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), or other environmental issues in connection with the site. The facilities are called out as RECs based on their proximity to the project and potential for access (Figure 3).

7.2 Recommendations

This ISA has been conducted in conformance with the scope and limitations of ASTM Standard E 1527-05. Two RECs were identified. These are noted as Oil Well #Z25, located on the proposed trail; and Well Z22, located on the proposed staging area. Although these RECs are completely fenced, shrouded with barbed wire, and considered inaccessible to the public, it is recommended that additional signage at each entrance and end of the proposed trail depict the existence of the facilities and their potential hazard.

Based on the above findings, no hazardous materials are anticipated to be discovered during construction activities. The proposed project would not include any drilling activities that would encounter groundwater.

Currently, it has not been decided if the proposed trail will extend over the BNSF railroad. If construction of a grade separation and bridge is to be initiated, precautions should be for encountering soil that could be contaminated with known chemical compounds related to the railroad.

7.3 Deviations

There were no deviations to the ASTM Standard Practice associated with the preparation and development of this ISA.

9. REPORT AUTHORSHIP

Sapphos Environmental, Inc. is pleased to submit this ISA report to Alta Planning + Design and the City of Placentia for the proposed project known as the Atwood Multipurpose Trail. This ISA was performed in general accordance with the Sapphos Environmental Inc. proposal submitted on June 7, 2021, approved and signed by Alta Planning + Design and Sapphos Environmental, Inc. on November 9, 2021.

Should you have any questions regarding this report, please feel free to call us at (626) 683-3547.

This Initial Site Assessment report was prepared by:

Eric T. Vander Velde
Senior Geologist-Hazmat Specialist
Sapphos Environmental, Inc.
430 North Halstead Street
Pasadena, CA 91107

This Initial Site Assessment report was reviewed by:

Eric Vander Velde
Senior Environmental Compliance Specialist
Sapphos Environmental, Inc.
430 North Halstead Street
Pasadena, California 91107

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professionals as defined in §312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Sapphos Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2

CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 50 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 31 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there are 3 CA SWF/LF sites within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 10/18/2021 has revealed that there are 52 CA CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 115 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAL000336979

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 10/26/2021 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CARBON CANYON FLOOD		W 1/2 - 1 (0.846 mi.)	BL370	2379

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/04/2021 has revealed that there are 4 FINDS sites within approximately 0.001 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 2 CA HAZNET sites within approximately 0.001 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 10/18/2021 has revealed that there are 2 CA CERS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

EXECUTIVE SUMMARY

CA RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

A review of the CA RGA LF list, as provided by EDR, has revealed that there is 1 CA RGA LF site within approximately 0.001 miles of the target property.

HART DON TRUCKING (Continued) **1000391816**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business [Truncated]

Eval Notes:	AFFORDABLE CYCLE & MARINE On site for a routine hazardous waste inspection. Steven Clark consented to this inspection. Observed facility and inspected hazardous waste storage areas. Facility generates the following hazardous wastes: waste oil, waste gasoline and drained used oil filters. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Emergency information was posted. Manifests were available for review. Facility is currently using EPA ID # CAL000355315. Facility s number has become inactive. DTSC EPA ID# application form was left with generator to assist with reactivating their number. Inspected perimeter of the facility and found no evidence of hazardous waste run-off.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes:	Reviewed hazmat disclosure submittal in Esubmit. Not accepted. Revise the Business Activities page and mark "yes" for hazardous waste generator. According to our records, past inspections have indicated you have 55 gallon storage for waste oil and waste antifreeze. You must disclose each of these chemicals. You have entered a disclosure for waste oil; however, the largest container volume needs to state 55 gallons. Enter the Annual Waste AMount, State Waste Code and 365 days. Complete the Emergency Plan.

Eval Notes: On site for a routine hazardous waste inspection. Lance Lichtenwalter consented to this inspection. Observed facility and inspected hazardous waste storage areas. Facility generates the following hazardous wastes: waste coolant, waste oil, used oil filters and parts washer waste. Containers were stored closed and were properly labeled. Containers appeared to be in good condition. Manifests/receipts were available for review. Facility is assigned EPA ID# CAL000216545. Facility s number is INACTIVE. EPA ID# form given to operator to assist with reactivation of number. Emergency information is available. Inspected perimeter of facility and dumpster area and found no evidence of hazardous waste.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes:	On site for a routine hazardous materials inspection. Inspection was conducted with Edwin Shores. Observed facility and reviewed electronic submittal. Facility has disclosed 10 chemicals. Materials reported are consistent with those observed on site. Facility does have one propane tank used on the forklift. Review volume of this tank and add to your disclosure if the amount is at/above 200 cubic feet. There were no other materials observed on site meeting disclosure threshold amounts. There are corrections that are needed to the chemical inventory disclosure. Facility s disclosure was made to the E-submit system. The E-submit system has been closed down and data is being moved to the State s electronic reporting system (CERS). Once you have been notified that your data has been transferred to CERS, update your electronic submittal with the following corrections within 60 days: CHEMICAL INVENTORY For all chemicals, remove the CAS# from the Chemical Information [Truncated]

Eval Notes: On site for a routine hazardous waste inspection. Edwin Shores consented to this inspection. Observed facility and inspected hazardous waste storage areas. Facility generates the following hazardous wastes: used oil, drained used oil and gasoline filters, waste absorbent and waste antifreeze. Containers of hazardous waste were stored closed with the exception of one drum of waste absorbent with a label that did not contain the hazardous characteristic or physical state (see violation). Label was corrected at the time of this inspection. Violation is abated and there is no further action required. Ensure containers of hazardous waste are labeled with all required information. Manifests were not available at the time of the inspection but were forwarded to this Agency following the inspection. Facility is assigned and using active EPA ID# CAL000397139. Emergency information is posted. There was no evidence of hazardous waste runoff.

Eval Notes:	The HMBEP submittal was declined in E-Submit. See comments below. 1/8/16 Hi Edwin, thank you for the update. There are still a few things that are not consistent. Please see the comments below. Thank you! Antifreeze: the storage container currently says aboveground tank. It is actually stored in a tote bin, please update. The largest contain is 275 gallons, not 385 gallons. Waste antifreeze: the days on site said 30 days out of the year. Is this true? If you have waste antifreeze generated daily or monthly, it should be 365 days. The storage container should be tote bin. Motor Oil: CAS Number needed. The fire hazard class is combustible. Gear Oil: Chemical name cannot be mixture, please provide the appropriate chemical name. The CAS cannot be the percentage weight. The fire hazard class is combustible. It must contain the proper number in the correct format. Is this stored in a steel drum? I don t recall it being in an aboveground tank. Could you Thank [Truncated]

Eval Notes:	Managed Mobile 1901 Nancita Circle Placentia, CA 92870 INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Edwin Shores, Site Coordinator. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is available in the Human Resource office. The dumpster/enclosure was observed. Flammable liquid waste from punctured aerosol cans was kept on site over allowed accumulation period (accumulation start date on current storage drum is 8/22/2011). Facility must immediately dispose of hazardous waste and provide manifest within 30 days of receiving this notice.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-01-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine aboveground storage tank inspection. Inspection was conducted with Edwin Shores. Facility is regulated under the Aboveground Storage Tank Act (APSA). Facility has between 1,320 and 9,999 gallons of regulated petroleum products. Facility has the Following: 1) On site SPCC Prepared and implemented. This plan is dated 12/28/2015. 2) Facility personnel conduct monthly monitoring. Information is stored electronically and was reviewed. 3) Facility has appropriate secondary containment or diversionary structures
Eval Division:	Orange County Environmental Health
Eval Program:	APSA
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-17-2019
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous materials inspection. Facility has disclosed 10 materials, including wastes. There were no other materials observed on site meeting minimum disclosure thresholds. Site map was reviewed and appears accurate. Please verify transmission oil and gear oil are only stored at 55 gallons. Materials were observed to be stored in 200 gallon aboveground tanks.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-17-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Ensure hazardous waste containers are labeled with all required information, including hazardous properties. Drums containing oil-contaminated absorbent waste were observed to be missing the hazardous characteristic. Labels were corrected at the inspection and facility is now in compliance.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On-site for the APSA routine inspection. Met with Wayne Gyssler this date. Toured the facility and reviewed the SPCC Plan this date. Photos were taken with the permission from Wayne Gyssler. According to Wayne Gyssler, the plan was developed but has not been implemented.

BEJAC CORP (Continued) **1005654744**

Discussed the need to implement all aspects of the SPCC Plan immediately. The plan was reviewed in August 2011. No changes have been made to the plan since this time. The SPCC Plan lists the following regulated tanks: 1) 12K diesel AST (split 10k and 2k) integral secondary containment. 2) New and used oil storage area with (7) single walled ASTs within a covered and bermed containment. 3) Various 55 gallon drums over the site and (2) 55 gallon drums on a secondary pallet in the paint room. The Plan is certified by a PE (06/16/11) and signed by management on (07/19/11) The Certification of Substantial Harm Determination was signed on 07/19/11 as well. ENFORCEMENT IS PENDING

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Robert Cycon consented to this inspection. Observed facility and inspected hazardous waste storage areas. Containers of hazardous waste were stored closed and properly labeled with the exception of the waste filters which were not stored closed (see violation). Filters were observed piled up above the top of the drum. Other drums were observed to be closed. Per Mr. Cycon, the hauling company has been contacted to remove the filters, but has not been responsive. Send a copy of the receipt for the removal of the filters to abate this violation. Containers appeared to be in good condition. Manifests were available for review. Facility is assigned and using active EPA ID Number CAL000015979. Inspected perimeter of the facility and found no evidence of hazardous waste runoff.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-12-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous materials inspection. Facility has complied with the 2017 HMBEP reporting requirement, although corrections to the submittal are needed (see comments below). Inspection was conducted with Robert Cycon. Facility has disclosed 15 chemicals (3 waste). Chemicals reported are consistent with those chemicals observed on site. Amounts reported appear to be accurate. While on site it was observed that facility also stores liquid nitrogen. Per Mr. Cycon, this material is used intermittently for occasions when bearings are replaced. If this material is stored on site on a routine basis, add this material to your disclosure. Site map was reviewed and appears to be accurate. Business emergency plan training records could not be located at the time of the inspection (see violation). Forward a copy of the sign in sheet for annual training to this Agency within 30 days. Violation Date: 01-27-2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 09/13/2016. Each generator must maintain the following documents and records at the facility: a) The job title for each position at the facility related to hazardous waste management, and the name of each employee filling each job. b) A written job description for each job title mentioned above and must include the required skills, education, or other qualification, and duties of personnel assigned to each position.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Robert Cycon consented to this inspection. Observed facility and inspected hazardous waste storage areas. Containers of hazardous waste were stored closed and properly labeled with the exception of the waste filters which were not stored closed (see violation). Filters were observed piled up above the top of the drum. Other drums were observed to be closed. Per Mr. Cycon, the hauling company has been contacted to remove the filters, but has not been responsive. Send a copy of the receipt for the removal of the filters to abate this violation. Containers appeared to be in good condition. Manifests were available for review. Facility is assigned and using active EPA ID Number CAL000015979. Inspected perimeter of the facility and found no evidence of hazardous waste runoff.

Eval Notes:	Received an email dated 03/21/14 from Robert Cycon detailing the steps this facility has taken and has taken in the past to implement the SPCC Plan. Reviewed the email and the documentation attached to the email: Violation AT01 was VOIDED this date. It appears that the facility has implemented the SPCC Plan. Violation AT02 and AT31 are still outstanding. According to the email, the required SPCC Inspections are now being conducted. Please email examples of these completed inspection to this agency for review. Violation AT08 is voided this date. The facility provided paperwork (attached) showing the date of purchase of the tanks (10/11/13) which is within 6 months of the inspection date. According to the email, the PE is schedule to be on-site on 03/25/14 in order to add these tanks to the plan. The email also explained that the new plastic tank has never been used and is marked and locked out (picture attached). Violation AT34 is abated this date. [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Facility is a California LQG. Hazardous waste was observed to be managed well, however several containers were observed stored open. The waste waterborne paint solvent and two drums of waste used oil filters were observed stored open (waste filters without lid and waste paint solvent with open funnel). Maintain waste stored closed except when adding or removing waste. A follow up inspection will be conducted to determine compliance.

Eval Notes:	On site to conduct a routine aboveground storage tank inspection. Inspection was conducted with Robert Cycon. Observed facility and reviewed the SPCC plan this date. The SPCC plan dated May 2014 was available on site and was reviewed. No changes have been made to the plan and there have been no changes to the regulated inventory since this time. The following regulated containers are listed: 1) 12,000 diesel AST with integral secondary containment 2) New and used oil storage area: (7) single walled ASTs in a bermed area 3) 2-250 gallon new oil ASTs with integral secondary containment Facility conducts monthly inspections of the aboveground petroleum storage areas. Inspection documentation was reviewed. Annual training records were reviewed.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous materials inspection. Facility has complied with the 2017 HMBEP reporting requirement, although corrections to the submittal are needed (see comments below). Inspection was conducted with Robert Cycon. Facility has disclosed 15 chemicals (3 waste). Chemicals reported are consistent with those chemicals observed on site. Amounts reported appear to be accurate. While on site it was observed that facility also stores liquid nitrogen. Per Mr. Cycon, this material is used intermittently for occasions when bearings are replaced. If this material is stored on site on a routine basis, add this material to your disclosure. Site map was reviewed and appears to be accurate. Business emergency plan training records could not be located at the time of the inspection (see violation). Forward a copy of the sign in sheet for annual training to this Agency within 30 days. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Gasoline, Diesel

MOBIL OIL CORP. (Continued) **S105256946**

Site History: In April 2005, petroleum hydrocarbons (up to 390 mg/kg of TPH) were discovered around underground piping during a fire seal investigation. Some contaminated soil was excavated from around one of the fire seals and the City of Anaheim Fire Department requested a soil and groundwater assessment. In August 2005, two borings were drilled near the northern fire seal. Maximum concentrations of petroleum hydrocarbons in soil samples collected were: 49,000 ug/kg of TBA, 2,200 ug/kg of MtBE, 8.4 ug/kg of ethylbenzene, 88 ug/kg of xylenes, and 3.6 mg/kg of TPH as gasoline at 20 feet in B1, and 27 mg/kg of TPH as diesel fuel at 60 feet in B2. In March 2006, during the installation of two wells (MW1 and MW2) MtBE was detected in soil at a depth of 70 feet at a concentration of 620 ug/kg and TBA was detected in a soil sample collected at a depth of 65 feet at a concentration of 330 ug/kg in MW1 and TPH, ethylbenzene, toluene and xylenes was detected at a maximum concentration of 880 mg/kg in a soil collected at 35 feet from MW2 at 880 mg/kg, 1,400 ug/kg, 220 ug/kg, 22,200 ug/kg, respectively. Groundwater monitoring is ongoing.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
TSCA SUBMITTER
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

EXCELLO CIRCUITS, INC. (Continued) **1000819308**

generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-28-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on February 28, 2018. Staff met with Mr. Rax Ribadia. Mr. Ribadia called his consultant, Mr. Bill Habenicht, to visit the facility to show Staff the SWPPP and training records. The SWPPP was reviewed and is up-to-date. Their last training records were dated October 25, 2017. The facility is currently in Level 1 for Ammonia and Level 2 for Copper, Total. The facility s Level 2 ERA Action Plan outlined the Industrial Demonstration for Copper. A site walk was conducted and the facility is swept weekly. All chemicals and 55-gallon drums are stored in a bermed secondary containment structure. Industrial equipment is stored outside under tarps.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business [Truncated]

Site Name: SWISS CLEANERS
Violation Date: 01-30-2020
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Obtain a new EPA ID#. Numbers are owner specific.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 414797
Site Name: SWISS CLEANERS
Violation Date: 06-11-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Not reported
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 08-20-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a follow up inspection. Facility does not appear to be in business. There are a few clothes items hanging from one rack, however debris is scattered on the floor. The dry cleaning machine remains on site. Observed two 55-gallon drums of hazardous waste with faded labels stored outside the back door inside of a low-wall enclosure.

Eval Notes:	Please be advised that on 1/29/2020 an onsite inspection was conducted by this agency and this facility was inspected and added to the Hazardous Materials Disclosure program. In the inspection report dated 1/29/2020 you were notified that the amount of perchloroethylene and perchloroethylene waste on site was above the minimum reporting threshold of 55 gallons. You were directed to comply with the electronic reporting requirement for storage of hazardous materials under the Hazardous Materials program. The following violation regarding disclosure, which remains outstanding, was cited in the inspection report that was delivered to your facility on 1/30/2020: - I208: Failure to establish and implement a business plan (HMBP) when storing and/or handling hazardous materials at or above disclosure threshold. Facility s HMBP must be electronically submitted by going to California Environmental Reporting System (CERS) at http//cers.calepa.ca.gov within 30 days of this [Truncated]

Address: 1961 PETRA LN
City,State,Zip: PLACENTIA, CA 92870
Site ID: 414577
CERS ID: 10574929
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 414577
Site Name: NALCO WATER PTS LLC
Violation Date: 12-14-2015
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 07/03/2017. I283 - Generator has prepared a and maintained a Hazardous Waste Source Reduction Report (SB-14). 22 CCR 66262.27(a) and H&SC 25244.21(a). Hazardous Waste Source Reduction Report (SB-14) was not available on site. Any facility who generates over 12,000 kilograms of hazardous waste in a reporting year (2015) will need to complete an SB-14 report, which includes a Source Reduction Evaluation Review and Plan, a Hazardous Waste Management Performance Report, an a Summary Progress Report. A copy of this report must be retained on site. Violation must be correct immediately.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 414577
Site Name: NALCO WATER PTS LLC
Violation Date: 12-14-2015
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description: Failure to properly label the following categories of universal waste as: 1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)". 2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment". 3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)". 4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)". 5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)". 6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass". 7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT(s)/Universal Waste-CRT Glass".

NALCO WATER PTS LLC (Continued) **S124751867**

Violation Notes: Returned to compliance on 12/14/2015. The universal waste container was not properly labeled with an accumulation start date and content. Violation was corrected during the inspection.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 414577
Site Name: NALCO WATER PTS LLC
Violation Date: 12-14-2015
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 07/03/2017. The universal waste (UW) container was not properly closed when not in active use. All UW containers must be stored closed when not in use. Violation must be corrected immediately.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 414577
Site Name: NALCO WATER PTS LLC
Violation Date: 12-14-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/03/2017. Low and high pH wastewater tanks are not labeled with the word Hazardous Waste . Hazardous waste tanks must be labeled with the words "Hazardous Waste" and the accumulation start date must be documented on the tank or in the facility operating log. Violation must be corrected immediately.

Violation Description: Failure of the new hazardous waste tank assessment to include all of the following information: 1) Tank configuration (i.e., horizontal, vertical), material of construction, and gross capacity (in gallons); 2) Design standard(s), if available, according to which the tank and ancillary equipment were or will be constructed and all of the following information: A) Material of construction; B) material thickness and the method used to determine the thickness; C) description of tank system piping (material, diameter); D) description of any internal and external pumps; and E) sketch or drawing of tank including dimensions. 3) Documented age of the tank system (if tank was previously used), if available, (otherwise, an estimate of the age); 4) Description and evaluation of any leak detection equipment;

NALCO WATER PTS LLC (Continued) **S124751867**

5) Description and evaluation of any corrosion protection equipment, devices, or material; 6) Description and evaluation of any spill prevention or overfill equipment; 7) Description and evaluation of secondary containment for the tank system (secondary containment must meet minimum standards as specified in subsections (j)(1) through (j)(3) of this section) including applicable secondary containment for ancillary equipment as required in subsection 66265.193(f); 8) Hazardous characteristics of the waste(s) that have been or will be handled; 9) Prior to placing a new tank system or component in use, an independent, qualified installation inspector or an independent, qualified, professional engineer, registered in California, either of whom is trained and experienced in the proper installation of tank systems, shall inspect the system or component for the presence of any of the following items and document in writing the results of the inspection: A) Weld cracks or breaks; B) scrapes of protective coatings; C) corrosion; D) any structural damage or inadequate construction or installation such as cracks, punctures, damaged fittings. All discrepancies shall be documented in the assessment and remedied before the tank syste

Violation Notes: Returned to compliance on 07/03/2017. Tank system assessment was not conducted every 5 years. Hazardous waste storage tank and secondary containment system must be certified by a civil, structural, or geotechnical profession engineer. Engineer assessment report must include all required information per CCR, Title 22, Section 66265.192. An updated copy of the assessment must be retained at the generating facility. Violation must be corrected immediately.

Eval Notes: HMBEP submittal declined. Re-submission requested. See comments below. Hello, your HMBEP submittal has been declined for the following reasons. Please see the comments below: Chemical Inventory: Please add waste hydrochloric acid, and waste sodium hydroxide. Regardless of the outcome of the waste determination, the two tanks are still considered to be storing hazardous materials since it can still be an irritant and may generate toxic or irritating vapors when heated. The purpose of the Hazardous Materials Business Plan Program is to keep first responders safe. Therefore, all hydrochloric acid and sodium hydroxide solution (diluted or concentrated), must be disclosed, especially with such high storage volume. You can specify the concentration of the solution and pH in the common name section to avoid confusion. I understand we are still working on the pH issue, so please disclose what you can now and make updates later. Thank you. Any questions please feel free to [Truncated]

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Plant Manager Nat Ieamwongnukul assisted with the inspection. Facility appears to be a Large Quantity Generator (non-RCRA) at this time. Facility regenerates resin columns for water treatment and generates waste acid (HCL) and base (NaOH). The wastes are sent from the resin columns directly to one of two tanks where they are combined, undergoing elementary neutralization. Both the HCL and NaOH are less than 10% per information received from facility operator. Per 23CCR (25201.13), the neutralization process is an exempted treatment process. Neutralization tanks are an integral part of the treatment operation. Facility continues to be regulated as a generator of hazardous waste for wastes generated from the point that the acid and base wastes leave the resin column to the point that they enter the neutralization tank. Neutralized wastes are discharged to the sewer under permit.

Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by David McDowell, Operations Manager. Facility regenerates water treatment ion exchange canisters with HCl and NaOH. The ion exchange columns are supplied to customers for treatment of public water system water and not for waste water treatment. The spent effluent, approximately 20 million gallons annually, is pumped to a low and high pH wastewater holding tanks. The wastewater are blended in a 3-stage holding tank system to ensure the pH is within the POTW s pH discharge limits. The facility monitors pH at the holding tank prior to discharge. If the pH is not within the limits, the wastewater gets recycled back into the holding system for further neutralization. pH sensors are tested monthly for functionality. According to Mr. McDowell, both low and high waste water tank has a concentration of 6-8% acid/base. The pH of the low pH [Truncated]

Eval Notes: HMBEP submittal declined. Re-submission requested. See comments below. Hello, your HMBEP submittal has been declined for the following reasons. Please see the comments below: Chemical Inventory: Please add waste hydrochloric acid, and waste sodium hydroxide. Regardless of the outcome of the waste determination, the two tanks are still considered to be storing hazardous materials since it can still be an irritant and may generate toxic or irritating vapors when heated. The purpose of the Hazardous Materials Business Plan Program is to keep first responders safe. Therefore, all hydrochloric acid and sodium hydroxide solution (diluted or concentrated), must be disclosed, especially with such high storage volume. You can specify the concentration of the solution and pH in the common name section to avoid confusion. I understand we are still working on the pH issue, so please disclose what you can now and make updates later. Thank you. Any questions please feel free to [Truncated]

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Plant Manager Nat Ieamwongnukul assisted with the inspection. Facility appears to be a Large Quantity Generator (non-RCRA) at this time. Facility regenerates resin columns for water treatment and generates waste acid (HCL) and base (NaOH). The wastes are sent from the resin columns directly to one of two tanks where they are combined, undergoing elementary neutralization. Both the HCL and NaOH are less than 10% per information received from facility operator. Per 23CCR (25201.13), the neutralization process is an exempted treatment process. Neutralization tanks are an integral part of the treatment operation. Facility continues to be regulated as a generator of hazardous waste for wastes generated from the point that the acid and base wastes leave the resin column to the point that they enter the neutralization tank. Neutralized wastes are discharged to the sewer under permit.

Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by David McDowell, Operations Manager. Facility regenerates water treatment ion exchange canisters with HCl and NaOH. The ion exchange columns are supplied to customers for treatment of public water system water and not for waste water treatment. The spent effluent, approximately 20 million gallons annually, is pumped to a low and high pH wastewater holding tanks. The wastewater are blended in a 3-stage holding tank system to ensure the pH is within the POTW s pH discharge limits. The facility monitors pH at the holding tank prior to discharge. If the pH is not within the limits, the wastewater gets recycled back into the holding system for further neutralization. pH sensors are tested monthly for functionality. According to Mr. McDowell, both low and high waste water tank has a concentration of 6-8% acid/base. The pH of the low pH [Truncated]

Eval Notes:	On site for a routine hazardous waste generator inspection. Facility appears to be a Large Quantity Generator (non-RCRA) at this time. Facility regenerates resin columns for water treatment and generates waste acid (HCL) and base (NaOH). The wastes are sent from the resin colums directly to two tanks where they are combined, undergoing elementary neutralization. Previously, the wastes were sent separately to two holding tanks (1 for acid and 1 for base) and then combined at a third tank. Facility has changed its process so that both wastes are now combined at the previously separated tanks. Both the HCL and NaOH are less than 10% as per information received during the 12/14/15 inspection. Per 23CCR (25201.13), the previously identified hazardous waste tanks are no longer regulated under hazardous waste generator requirements and are now part of the exempted treatment process because the tanks are now an integral part of the treatment operation. Facility continues to be [Truncated]

Violation Source:	CERS,
Site ID:	398267
Site Name:	NICKEY PETROLEUM
Violation Date:	06-09-2015
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes:	Returned to compliance on 06/09/2015. The audible component of the overfill prevention was observed to not be working upon arrival. The light bulb was replaced and the system was observed to be functioning. This violation is abated. No further action is required.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.
Violation Notes:	Returned to compliance on 07/15/2015. The current inspection checklist does not include the regulated petroleum products in the warehouse. The updated inspection checklist found in the SPCC amendment of May of 2013 needs to be implemented. Please start using this checklist immediately.

Eval Notes:	Business has not submitted HMBP documents to CERS. An email has been sent to the facility contact listed in CERS: From: Wales, Lisa Sent: Wednesday, March 31, 2021 9:50 AM To: leoemedina@outlook.com Subject: Hazardous Materials and APSA Submittals Past Due Good Morning, I was looking through the database, and I see that your business, Nickey Petroleum, still has not submitted your electronic haz mat disclosure nor the required tank facility information for APSA, in CERS. Our Agency sent out reminder letters in January, but you may not have receive it. The haz mat disclosure was due on March 1st. I ve included a link with information from CERS on the steps to take to submit your information if there have been no changes in your chemical inventory since your last disclosure: https://cers.calepa.ca.gov/wp-content/uploads/sites/11/2017/04/hmbp-no -change-submittals_submittals.pdf The CERS reporting system website address is on page 1 of the instructions. reviewed EHD report comment history. - reviewed SR0122158 (UST repair modification) for this site. UST violations "TM02" (18 fuel dispenser UDCs that had previously failed SB-989 testing) were observed to still remain on the EHD open violation listing. Comments by another EHD inspector indicated that they had witnessed successful precision hydrostatic testing 12/2/2013; testing results, all UDCs passed. Test report for successful testing received on 12/19/13. TM02 violation not abated at that time. TM02 abated this date. No further action required.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Source: CERS,

Site ID: 398662
Site Name: United Pacific 0683
Violation Date: 04-29-2016
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.
Violation Notes: Returned to compliance on 08/02/2016. The 91 fill sump did not pass testing. Please immediately repair and re-test these components. A 48-hour notification must be provided to this Agency prior to conducting the re-test. Please submit a copy of the repair work order and re-test report to this Agency for review within 30 days of repair completion. Repair may require that a Facility Modification Application (including fees, 4 sets of site map and scope of work, Contractor License, ICC Certification, Equipment Certification) to be submitted to this agency for review and approval prior to the commencement of work.

Violation Date: 06-27-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 06/27/2019. Overfill prevention testing was conducted this date.

Eval Notes: On site for routine underground storage tank inspection, monitoring system certification, and spill bucket testing. Tester s certifications were verified. The facility has three double walled tanks monitored by a Veeder Root system. Monitor is operational for audible and visual alarms. The panel reads "all functions normal." Positive shutdown and fail safe programming were verified. Flapper valves are installed for overfill prevention. All sump and UDC sensors were found to be located at the lowest point of each sump/UDC. All sumps and UDCs appeared to be dry. Fail-safe system functioned properly. Fail-safe system was tested by cutting power to the Veeder Root control panel. Turbine engines shut down when the power was removed. Spill buckets were visually tested for 30 minutes. At the end of the test period, no indication of leakage was observed. Leak detectors were tested after the inspector left. Certification stickers were attached to all components tested. [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 09/03/2020. Waste coolant has been stored longer than allowable accumulation time limits. Please have this waste removed and send a copy of the receipt/manifest to this Agency within 30 days.

Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Andy Aguilar consented to this inspection. Observed facility and inspected hazardous waste storage areas. Facility generates the following hazardous wastes: waste oil and used oil filters Containers of hazardous waste were stored closed and properly labeled. Containers

HUNTER LANDSCAPE (Continued) **S123518116**

	appeared to be in good condition. Emergency information was posted. Manifests were on site and available for review. Facility is currently assigned and using active EPA ID Number CAL000288419. Inspected perimeter of the facility and found no evidence of hazardous waste run-off.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	06-16-2017
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed updated HMBEP submittal. Waste antifreeze has been added to the disclosure and corrections made to the waste oil and site map. All forms were accepted. Facility has disclosed 12 chemicals (2 waste).

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
